STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

Robert P. Casey
Governor

N. Mark Richards, M.D.
Secretary of Health

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Coöperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

Robert P. Casey
Governor

N. Mark Richards, M.D.
Secretary of Health

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

WASHINGTON

1988

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.

STATE HEALTH DATA CENTER

Promoting effective programs that improve the health of Pennsylvania's residents is a primary goal of the Department of Health. In order to truly understand the health care needs of the Commonwealth and its communities, the Department must collect, maintain, and disseminate statistical information on the health status of its citizens. This pamphlet is intended to support that goal by educating government leaders, health program specialists, state and local planners as well as the concerned general public about the types of people who reside in Pennsylvania, the health problems that afflict them, and the various kinds of health services available and used by them.

The Health Profiles for Pennsylvania Counties are a series of 68 individual profiles — one for each county and one for the Commonwealth. The most recent information available was used. The year which the data represents is included in the profiles following each data item. Estimated population figures are used throughout the profiles for the listed population as well as in the computation of all rates.

The major data source is the State Health Data Center, Pennsylvania Department of Health — specifically the Vital Statistics Cooperative Program and the Annual Hospital and Long Term Care Facilities Questionnaires. Additional sources include other units of the Department (i.e., the Bureaus of Quality Assurance, Epidemiology and Disease Prevention, Special Public Health Services, and Maternal/Child Preventive Health Programs, and the Office of Drug and Alcohol Programs), Pennsylvania State Data Center, Pennsylvania Department of Public Welfare, Pennsylvania Office of Employment Security, and Pennsylvania Department of Transportation.

The profiles will continue to be updated biennially, with the next edition available in 1990. Comments and suggestions for improvement are welcome. If there are any questions or if additional information is needed, please contact the State Health Data Center, Pennsylvania Department of Health, P.O. Box 90, Harrisburg, Pennsylvania 17108, telephone number (717) 783-2548. The Pennsylvania Department of Health is an equal opportunity provider of grants, contracts, services, and employment.
